All you need is to sign up for the Photoshop Creative Cloud program on the Adobe website and then you are ready to start making amazing web images. The first step would be to open up Photoshop and then you need to find the canvas you would like to use to work on. Once you have your canvas ready you need to download the Photoshop web plug-in. After you have the plug in installed on your computer you will then open up Photoshop and once you have it opened up you can connect your Photoshop Document to your website. You can use Adobe FTP to upload and create version-controlled web sites and deploy them on all your desktop and mobile devices and platforms.
